IBM, EBM, ISBM or Jomar Choice

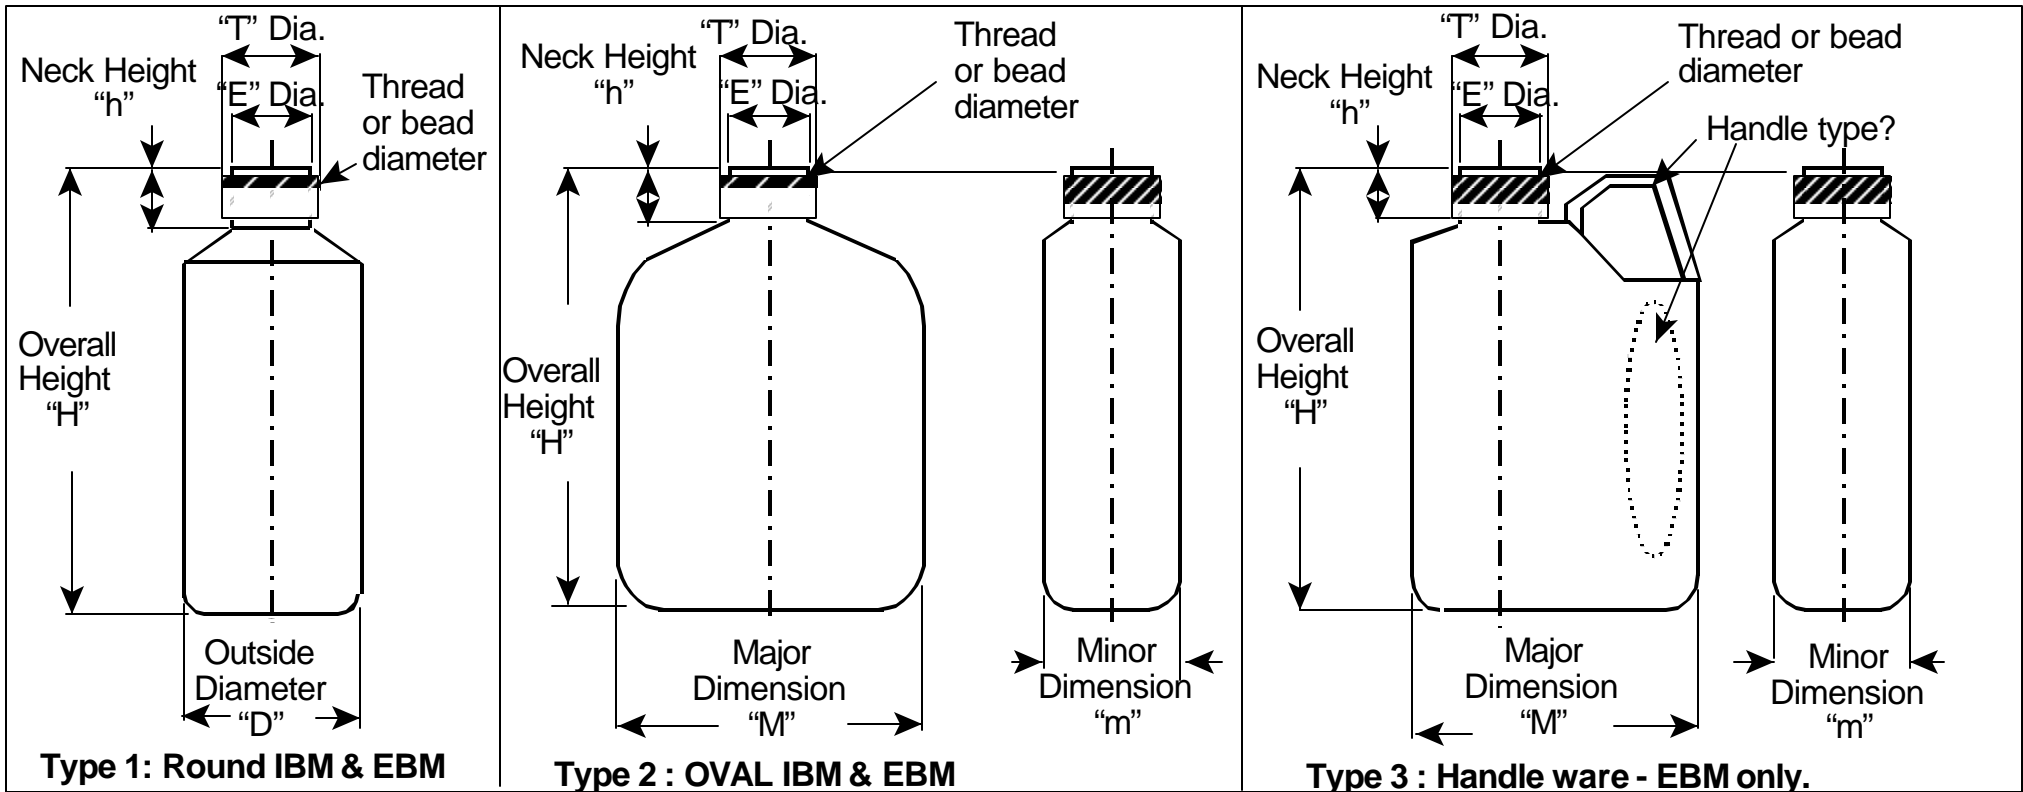

Yes / No

SKETCH HERE

QUOTATION REQUEST

	Sample #	1	2	3	4	5	6
Product description - Jar, Dropper, Cylinder, handleware etc							
Preferred Process - EBM, IBM, ISBM - ALL							
Containers Volume(s) - Brimfull in mls, litres or grams							
Material Required - HDPE, LDPE, PP, PS or specify							
Quantity per year or							
Qty/hour required x How many hours / week do you work							
Weight - grams							
Thread diameter "T"	See HELP on website						
Neck Bead or alternative	See HELP on website						
Minor Diameter "E"	See HELP on website						
Neck Height "h"	See HELP on website						
Overall Height "H"	See HELP on website						
Body Diameter "D"	Type 1 (see HELP on website)						
Maximum Axis "M"	Type 2 or 3 (see HELP on website)						
Minor Axis "m"	Type 2 or 3 (see HELP on website)						
Special Features?							
Handle required *	See HELP on website						
Special engraving / shape *							
Drawing Available?	Yes / No						
Sample Available?	Yes / No						

HELP?

FOR HANDLED, NON-STANDARD PACKAGING & TECHNICAL PARTS, send samples / drawings to Jomar for Quotation.

Fill in the details on the quote form and tick contact box so that your nearest Jomar office can contact you.

MATERIALS PROCESSED on Jomar bottle making machines:

Standard bottle materials are LDPE, MDPE, HDPE and PP. Most extrusion blow grades are suitable for both Injection (IBM) and Extrusion Blow Molding (EBM).

A lubricant may be required in IBM materials as a process aid to improve product quality and output.

Polycarbonate (PC) and PVC can be processed on IBM and EBM.

Barex, Polystyrene (PS) - High Impact polystyrene (HIPS), ABS, SAN, K resin, Santoprene and other engineering materials are usually processed in IBM, but can be processed on EBM.

LLDPE, HMWPE & PETG are usually only processed on Extrusion Blow molding equipment.

PET is only available on the IBM & ISBM range of machines.

**THE ABOVE IS A GENERAL GUIDE ONLY.
PLEASE CONTACT JOMAR WITH DETAILS OF YOUR PROJECT.**
